

Announcement and Call for Papers

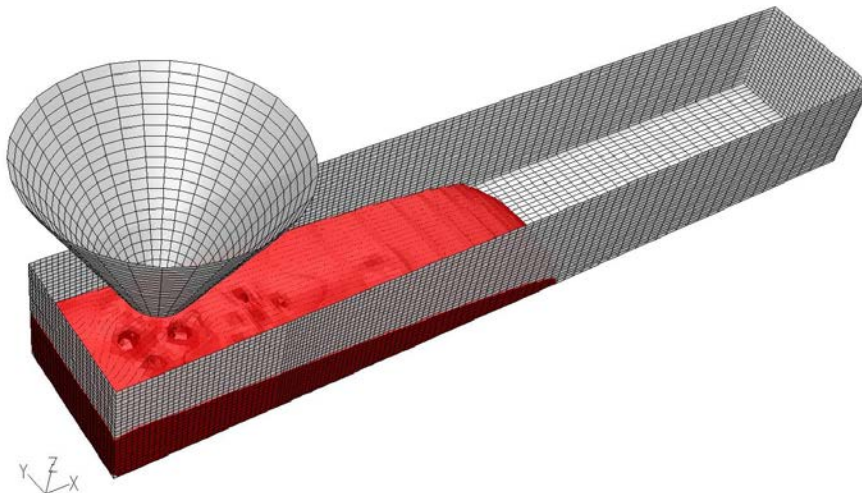

**Joint Symposium of the
German Rheological Society DRG and
ProcessNet-Subject Division "Rheology"**

Rheology Symposium 2019

including Special Session on „Rheology of Construction Materials“

February 26-27, 2019

Berlin, Bundesanstalt für Materialforschung und -prüfung (BAM)

The focus of the joint symposium of the German Rheological Society and the ProcessNet-Subject Division "Rheology" are the rheological properties of complex fluids. Colloidal and polymeric solutions and melts, filled systems and life science fluids exhibit complex flow behaviour. The objective of this symposium is to present novel results in the fields of theory and simulations, and experiments and applications. Contributions from academia and industry are highly welcome in order to elucidate the variety of flow phenomena of complex fluids.

In particular, young rheologists are encouraged to present their results and share their insights with the rheological community. In order to facilitate intensive discussions, there will be no parallel sessions. The conference language is German, but presentations in English are also welcome.

Abstract submission via email until **January 15th, 2019** to drg@bam.de
